

TIFTUF™

CERTIFIED BERMUDAGRASS

TifTuf™ Bermuda is the newest “Tif” release from the world-renowned University of Georgia breeding program. After two decades of rigorous testing, TifTuf proved superior drought resistance, maintaining quality and color while using 38% less water than other varieties. TifTuf’s growth allows for faster establishment and quicker recovery compared to other Bermudas. Recommended for residential, commercial and golf applications, it features an attractive bright green color with faster spring green-up and late fall color retention.

PERFORMANCE RATINGS

CHARACTERISTICS

APPEARANCE

Fine leaf blade; bright green during growing season, warm brown in dormancy; good fall color

SHADE TOLERANCE

Medium; better than other Bermudas

DROUGHT TOLERANCE

High

MAINTENANCE

Low

TECHNICAL DATA

- Superior drought resistance
- Requires 38% less water
- High traffic tolerance
- Low fertility requirements
- Low mowing frequency
- pH 6.0–6.5
- Full sun to partial shade
- Cold hardy

BEST USAGE

- Golf**
Fairways, tees and roughs
- Sports**
Medium- to high-end athletic fields
- Landscape**
Home lawns, commercial properties
