

TIF GRAND®

CERTIFIED BERMUDA

TifGrand® Bermuda offers superior quality in full sun, along with moderate shade tolerance. Perfect for golf courses, it is darker green than other Bermuda varieties such as Tifway or TifTuf™. TifGrand requires less nitrogen fertilizer to maintain its rich color and can be mowed below 0.5", although it thrives best at 0.5" to 1".

PERFORMANCE RATINGS

CHARACTERISTICS

APPEARANCE

Fine leaf blade; dark green during growing season, warm brown in dormancy

SHADE TOLERANCE

Medium

DROUGHT TOLERANCE

Medium

MAINTENANCE

Low

TECHNICAL DATA

- Drought resistant
